

Hindalco - An Overview

Hindalco Industries Limited is the flagship company of one of India's leading business houses, the Aditya Birla Group. The group has been in operations spanning over 5 decades with global presence.

A powerhouse in non-ferrous metals, Hindalco has 2 business activities - Aluminium and Copper.

Incorporated in 1958, Hindalco commenced production of Aluminium in 1962 at Renukoot – Uttar Pradesh with an initial capacity of 20,000 MTPA of aluminium metal. In 2000 Hindalco acquired a majority stake in Indian Aluminium Company Ltd. (INDAL) and the operations of these two companies subsequently merged. Manufacturing at Hindalco is vertically integrated from the raw material stage to the finished products. The power requirements are also met by its captive power generation plants.

Hindalco's product range includes primary aluminium ingots, billets, rolling slabs, redraw rods, alloy wire rods, sheet products, extruded profiles, foils and wheels.

Today Hindalco has two extrusions plants – one at Renukoot(Uttar Pradesh) and the other at Alupuram (Kerala). This catalogue describes extrusions manufactured at Hindalco's Alupuram facilities.
