

HIL/LHD/ENV/MOEF/ 376

Date: 19.11.2021

To,

The Additional Principal Chief Conservator of Forest (C) Ministry of Environment, Forests and Climate Changes Regional Office (ECZ), Ranchi-834002.

Sub: Compliance Report of EC conditions for Amtipani Bauxite Mining project of M/s Hindalco Industries Limited located in Dist- Gumla, Jharkhand for the period April'21 to September'21.

Ref: Environmental Clearance letter no J-11015/241/2005-IA II (M) dated 14th August 2006

Sir,

With reference to the above, we are submitting herewith the Compliance status report of EC conditions for **Amtipani** Bauxite mining project of **M/s Hindalco Industries Limited** located in Gumla, Jharkhand for the period April'21 to September'21. The lease detail is as below.

Lease area (ha)	Production Capacity (MT)	Lease Period
190.95	150000	13.03.2006 to 12.03.2056

Hope you will find the same in order.

Thanking You

Yours Sincerely FOR HINDALCO INDUSTRIES LIMITED

(Basudev Gangopadhyay) Sr GM (Geology & Environment)

Enclosure: - As Above

: Amtipani Bauxite Mine (190.95 ha) M/s Hindalco Industries Ltd

Environment Clearance No & date

: J - 11015/241/2005-IA.II (M), dated 14.08.2006

Period of compliance Report

: From 1st April 2021 to 30th September 2021

S No	Conditions	Compliance Status		
1	Specific Conditions	- Second and a second a		
1	All the conditions stipulated by the State Pollution Control Board in their NOC should be effectively implemented.	Implementations of stipulated conditions in NOC are full filled post which consent to operate has been granted by SPCB from time to time. The existing consent to operate is valid up to 31.12.2025. Productions of bauxite are within limits specified in Consent to Operate.		
2	The mining operations shall not intersect groundwater table. Prior approval of the MoEF and CGWA shall be obtained for mining below water table.	The mining operation confined within shallow depth (20 m max) and not intersected ground water. In future also, working zone will be restricted to above ground water table. We undertake that no mining is/was carried out below ground water table and the same status will be maintain in future also.		
3	The environmental clearance is subject to approval of the state land use Department, Government of Jharkhand for diversion of agricultural land for non-agricultural use.	Land acquisition is being done with permission of competent authority of State Government i.e. concerned Deputy Commissioner (D.C.) under CNT Act. The land lease agreement is being done with raiyat (Land Owner) for about 20 years with permission of State Govt with provision of returning the land as per the norms set by D.C. The compensation and facilities are being provided as per norms set in agreement. Thus, land acquisition has the approval of State Government,		
4	Top soil shall be stacked properly with proper slope with adequate measures and should be used for reclamation and rehabilitation of mined out areas.	Top soil is being stacked temporarily, if applicable and separately with proper slope & is being used for reclamation and rehabilitation simultaneously with mining operation.		

5	The waste generated in the initial period shall be dumped temporarily and backfilled in the mined out area. There shall be no permanent external OB dump in the project area. Concurrent backfilling should start from the fifth year onwards. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self- sustaining. Compliance status should be submitted to the Ministry of Environment & Forests on six monthly basis.	During mining concurrent backfilling of waste in worked out quarry is in practice. We are reviewing progress on continuous basis. Monitoring and management of rehabilitation is continuous through supervision. All three existing dumps have been exhausted by backfilling in the mine voids in a systematic and scientific manner. Compliance status is being submitted to the Ministry of Environment & Forests & Climete Change on sin merchly bein
6	Catch drains and siltation ponds of appropriate size should be constructed to arrest silt and sediment flows from soil and mineral dump. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted particularly after monsoon and maintained properly. Garland drain (size, gradient and length) shall be constructed for mine pit and sump capacity should be designed keeping 50% safety margin over and above peak sudden rainfall (based on 50 years data) and maximum discharge in the area adjoining the mine site. Sump capacity should also provide adequate retention period to allow proper settling of silt material. Sedimentation pits should be constructed at the corners of the garland drains and desilted at regular intervals.	Climate Change on six monthly basis. No run-off is generated from mining activities. However, to collect & manage rainwater during monsoon, part of mined out area is used as settling tank for the runoff. Rainwater stored is being used for watering the mine area, roads, green belt development and sprinkling as necessary. Catch drains, Garland drains of appropriate size are being constructed in both around the mine pit to prevent runoff of water and flow of sediments directly into the agricultural field and water bodies, if applicable. Sump of adequate capacity is being
7	Plantation shall be raised in an area of 79.3 ha including a green belt of adequate width by planting the native species around the ML area, roads, etc. in consultation with the local DFO/Agriculture Department. The density of the trees should be around 1500 plants per ha.	provided and maintained as required. Progressive plantation is under progress. During FY 2021-22 total 7000 nos. trees have been planted. Total 15.680 ha areas has been planted till date. In addition to this agricultural activity is going on reclaimed land. Green belt development programme is in progress with progress of mining activities.

8	The project authority should implement suitable conservation measures to augment ground water resources in the area in consultation with the Regional Director, Central Ground Water Board.	Suitable conservation measures to augment ground water have been taken as directed in CGWB NOC Viz. Constructing water harvesting pond etc. Catchment areas are being enhanced for accumulation of surface water in the harvested pond. Catchment drains are also being made and are being repaired time to time. We are not using any ground water for		
9	Regular monitoring of ground water level and quality should be carried out by establishing a network of existing wells and constructing new piezometers during the mining operation. The monitoring should be carried out four times in a year - pre-monsoon (April-May), monsoon (August), post-monsoon (November) and winter (January) and the data thus collected may be sent regularly to MOEF, Central Ground Water Authority and Regional Director Central Ground Water Board.	mining activities. The mining operation is not intersecting ground water table. We are not using ground water for an mining purpose. Piezometer has been installed for monitoring of ground water level. Water guality and level report are attached		
10	Prior permission from the competent authority should be obtained for drawl of water from the surface water bodies.	Rainwater harvested during rainy seaso is heing used for sprinkling on har roads, mining activities and raisin plantation. We are using water harveste by us and not stream water/surface water bodies for mining purposes.		
11	The project proponent shall monitor the spring discharge on long term basis (at least one major spring) both in terms of quantity and quality of water and records maintained. Six monthly report should be submitted to the Ministry of Environment and Forests and its Regional Office located at Bhubneshwar.	Spring is being monitored; report is attached as Annexure 1.		
12	Vehicular emissions should be kept under control and regularly monitored. Measures shall be taken for maintenance of vehicles used in mining operations and in transportation of mineral. The vehicles should be covered with a tarpaulin and shall not be overloaded.	Regular maintenance of vehicles is being done to minimize vehicular emission. All measures are being taken to control vehicular emission. The vehicles are being covered with tarpaulin while transportation of mineral.		
13	Drills should either be operated with dust extractors or should be equipped with water injection system	Wet drilling is in practice.		
14	Blasting operation should be carried out only during the daytime. Controlled blasting should be practiced. The mitigative measures for control of	Blasting time is fixed during Lunch Time i.e. 1.00 PM -2.00 PM. Controlled blasting method is in practice. All efforts		

S No	Conditions	Compliance Status
	ral Condition	
		Based on present resource estimate and peak rated production capacity mentioned in EC, Mining operation is being carried out.
19	A Final Mine Closure Plan along with details of Corpus Fund should be submitted to the Ministry of Environment & Forests 5 years in advance of final mine closure for approval.	Mining Plan along with progressive mine closure plan has been approved by Indian Bureau of Mines. Final Mine Closure Plan will be submitted in due time as per applicable guideline and timelines mentioned in MCDR/IBM guideline who are competent authority to approve the same.
10	The higher benches of the excavated void to be converted into water reservoir shall be terraced and afforested to stabilize the slopes. Peripheral fencing shall be done along the excavated area.	Water harvesting pond has been terraced and afforested to stabilize slopes. Peripheral fencing provided along excavated area.
18	Land ouster and land loser/affected people should be compensated and rehabilitated as per the National Policy on Resettlement and Rehabilitation of project Affected Families (NPRR), 2003	Land ouster and land loser/affected people are being compensated and rehabilitated as per statute/guidelines.
17		Effluent treatment mechanism (Oil and grease trap) has been installed in Amtipani minc lease area. The sewage water from domestic uses is being collected through individual septic tanks & soak pits.
10	Sewage treatment plant should be installed for the colony. ETP should also be provided for workshop and wastewater generated from mining operations.	There is no industrial wastewater generation from workshop within mine lease area, hence, ETP has not been installed. However, for washing of HEMM,
15	Consent to operate should be obtained from SPCB prior to start of production of mine	Consent to operate has been obtained prior to start of production. The existing consent to operate validity is up to 31.12.2025.
15	ground vibrations and to arrest fly rocks and boulders should be implemented	in charge per delay etc. are being taken to mitigate impact of blasting.

1	No change in mining technology and scope of working should be made without prior approval of the Ministry of Environment & Forests.	f la
2	No change in the calendar plan including excavation, quantum of mineral bauxite and waste should be made.	quantum of mineral bauxite and waste is being done as per IBM approved mining scheme and in scientific manner. Report is attached berawith as Amaguna 4
3	Conservation measures for protection of flora and fauna in the core & buffer zone should be drawn up in consultation with the local forest and wildlife departments.	Conservation plan for protection of flora
4	Four ambient in 21	 Mining. Permanent pillars are established within in the mine lease area. Daily water sprinkling on haul road. Transportation is carried out during day time only. Social activities are being undertaken in nearby areas etc. Awareness programme on conservation of flora and fauna through CSR activities.
•	Four ambient air quality-monitoring stations should be established in the core zone as well as in the buffer zone for RPM, SPM, SO2, NOx monitoring. Location of the stations should be decided based on the meteorological data, topographical features and environmentally and ecologically sensitive targets and frequency of monitoring should be undertaken in consultation with the State Pollution Control Board.	We have already established four ambient air quality monitoring stations in core zone as well as buffer zone. Monitoring is being carried out and reported to concern authoritics. Report is attached as Annexure 1 .
5	Data on ambient air quality (RPM, SPM, SO2 and NOx) should be regularly submitted to the Ministry including its Regional office located at Bhopal and the State Pollution Control Board / Central Pollution Control Board once in six months.	Being adhered to. Monitoring report is attached as Annexure-1.
6	Fugitive dust emissions from all the sources should be controlled regularly. Water spraying arrangement on haul roads, loading and unloading and at transfer points should be provided and properly maintained.	Mobile water tanker with sprinkling facility has been provided along haul roads, loading, unloading & at transfer points to arrest dust generation.

7	Measures should be taken for control of noise levels below 85 dBA in the work environment. Workers engaged in operations of HEMM, etc. should be provided with ear plugs / muffs.	PPEs are provided to workers	
8	Industrial waste water (workshop and waste water from the mine) should be properly collected, treated so as to conform to the standards prescribed under GSR 422 (E) dated 19th May, 1993 and 31st December, 1993 or as amended from time to time. Oil and grease trap should be installed before discharge of workshop effluents.	Industrial waste water (workshop and waste water from the mine) should be properly collected, treated so as to conform to the standards prescribed under GSR 422 (E) dated 19th May, 1993 and 31st December, 1993 or as amended from time to time. Oil and grease trap should be installed before	generation from workshop within mine lease area. We are not discharging any wastewater outside mine lease area. However, for washing of HEMM, Effluent treatment mechanism (Oil and grease trap) has been installed in Amtipani
9	Personnel working in dusty areas should wear protective respiratory devices and they should also be provided with adequate training and information on safety and health aspects. Occupational health surveillance program of the workers should be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed.	Periodic training on safety & occupational health are being imparted to workers and health checks up conducted.	
10	A separate environmental management cell with suitable qualified personnel should be set-up under the control of a Senior Executive, who will report directly to the Head of the Organization	cell with suitable qualified personnel is already formed and informed attached as	
11	The project authorities should inform to the Regional Office located at Bhubneshwar regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	Mining Plan along with progressive mine closure plan has been approved by IBM, Runchi, This is an example.	
		Currently, the Regional Office is located at Ranchi.	
12	The funds carmarked for environmental protection measures should be kept in separate account and should not be diverted for other purpose. Year wise expenditure should be reported to the Ministry and its Regional Office located at Bhubneshwar.	Budget is being prepared for purpose and expenditure is being reported to the ministry is stocked by	
13	The project authorities should inform to the Regional Office located at Bhubneshwar regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	Vide Point no. 11 above.	
14	The Regional Office of this Ministry located at Bhubneshwar shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data	Agreed and is being donc. Currently, the Regional Office is located at Ranchi.	

	/ information / monitoring reports.	
15	A copy of clearance letter will be marked to concerned Panchayat / local NGO, if any, from whom and suggestion / representation has been received while processing the proposal.	Complied.
16	State Pollution Control Board should display a copy of the clearance letter at the Regional office, District Industry Centre and Collector's office/ Tehsildar's Office for 30 days.	Displayed.
17	The project authorities should advertise at least in two local newspapers widely circulated, one of which shall be in the vernacular language of the locality concerned, within 7 days of the issue of the clearance letter informing that the project has been accorded environmental clearance and a copy of the clearance letter is available with the State Pollution Control Board and also at web site of the Ministry of Environment and Forests at http:/ /envfor.nic.in and a copy of the same should be forwarded to the Regional Office of this Ministry located Bhubneshwar.	Complied. (Documents already submitted).

BREAK UP THE COST OF ENVIRONMENTAL MEASURES DURING THE YEAR 2021-22

The composite cost during the year 2021-22 for environmental protection & pollution control by Jharkhand Mines division of M/s Hindalco Industries Ltd & M/s Minerals & Minerals Ltd for implementation of the suggested measures in EC at our all the operating mines in the state of Jharkhand-namely Pakhar (115,13 ha), Pakhar (15.58 ha), Pakhar (109.507 ha), Pakhar (8.09 ha), Pakhar (35.12 ha), Serengdag (140.06 ha), Serengdag (155.81 ha), Jalim & Sanai (12.14 ha), Gurdari (584.19 ha), Amtipani (190.95 ha), Kujam I (80.97 ha) Kujam II (157.38 ha), Bagru (75.41 ha), Hisri New (14.55 ha), Chiro kukud (152.57 ha), Orsa pat (196.36 ha), Bhusar (65.31 ha) and Bimarla Bauxite Mines (134.52 ha).

S No	Description	Budget (in Rupees) FY 2021-22	Actual (in Rupees) FY 2021-22 [From April'21 to September'2]		
1	Pollution Control & Environment monitoring	44,21,524.00	38,26,550.78		
2	Reclamation/ Back filing & Rehabilitation**	3,91,80,000.00	2,19,87,911.52		
3	Green belt, Plantation & Water spraying arrangement	50,25,900.00	19,62,336.16		
4	Rural Development	3,10,21,250.00	1,08,93,416.77		

**Part of OB removed cost.

(Basudev Gangopadhyay) Head (Geology & Environment)

Annexure 3

Date - 06.07.2020

Office Order

Environmental Cell has been re-constituted at Amtipani Bauxite Mine (Area 190.95 ha) comprising below mentioned team members. The team will ensure compliance of Environment Act, Regulation & Rule in respect of the said mines of Hindalco Industries Limited.

- 1. Mr. Anand Mishra (Coordinator)
- 2. Mr. Preet Ranjan Geologist
- 3. Mr. Harsh Khandelwal (Member)
- 4. Mr. Abhay Kumar Environment Engineer

The Undersigned is the in charge of above Environment Management Cell constituted for the purpose of ensuring compliances of environmental act rule and regulation for the above mine.
