The compensation and facilities are being provided as per norms set in agreement. Thus land acquisition has the approval of State Government.
3	Mining shall not intersect groundwater. The mine working shall be restricted to ground water table. Prior approval of the Ministry of Environment & Forests and Central Ground Water Authority shall be obtained for mining below water table.	The mining operation is confined within shallow depth (20 m max) and not intersected ground water. In future also, working zone will be restricted to above ground water table. We undertake that no mining is/was carried out below ground water table and the same status will be maintained in future also.
4	The project proponent shall ensure that no natural watercourse shall be obstructed due to any mining operation.	It is being ensured. No natural water course has been obstructed as yet and care will be taken in future also.

5	<p>Top soil shall be stacked properly with proper slope with adequate measures and should be used for reclamation and rehabilitation of mined out areas.</p>	<p>Top soil is being stacked properly with proper slope as and when required for its use for reclamation and rehabilitation.</p> <p>Sequential backfilling and reclamation of the mined out area are being exercised during mining operation.</p>
6	<p>The waste generated shall be concurrently backfilled in the mined out area. There shall be no external OB dump. Monitoring and management of rehabilitated areas should continue until the vegetation becomes self-sustaining. Compliance status should be submitted to the Ministry of Environment & Forest on six monthly basis.</p>	<p>Overburden and waste rock from the mining pit are being used for back filling.</p> <p>Earlier OB dumps being rehandled and is being backfilled into mining voids. Major portion of the dump is rehandled. Very small quantity is left out which will be handled with the progress of mining activity in due course of time.</p> <p>Thus there will not be any external dump at the end of mine life.</p> <p>Backfilling and plantation detail provided is attached in Annexure-4.</p>
7	<p>Catch drains and siltation ponds of appropriate size should be constructed to arrest silt and sediment flows from mine working. The water so collected should be utilized for watering the mine area, roads, green belt development etc. The drains should be regularly desilted particularly after monsoon and maintained properly.</p> <p>Garland drain (size, gradient and length) shall be constructed for mine pit and sump capacity should be designed keeping 50% safety margin over and above peak sudden rainfall (based on 50 years data) and maximum discharge in the area adjoining the mine site. Sump capacity should also provide adequate retention period to allow proper setting of silt material. Sedimentation pits should be constructed at the corners of the garland drains and desilted at regular intervals.</p>	<p>No run-off is generated from mining activities. However, to collect & manage rain water during monsoon, part of mined out area is used as settling tank for the runoff. Rain water stored is being used for watering the mine area, roads, green belt development and sprinkling as necessary.</p> <p>Catch drains, Garland drains of appropriate size are being constructed in both around the mine pit to prevent runoff of water and flow of sediments directly into the agricultural field and water bodies, if applicable.</p> <p>Sump of adequate capacity is being provided and maintained as required.</p>
8	<p>Plantation shall be raised in an area of 6.98 ha including a green belt of adequate width by planting the native species around the ML area, roads, reclaimed area etc. in consultation with the local DFO / Agriculture Department. The</p>	<p>Plantation is being carried out around ML area with progress of mining. Nos of sapling planted during FY 2021-22 period is 4730 nos. In addition to this agricultural activity is going on</p>

	density of the trees should be around 1500 plants per ha.	reclaimed land. The 4.91 ha areas has been planted till date.
9	The project proponent shall ensure that there shall be no discharge from the mine.	Ensured. There is no discharge from the mine.

A plan is drawn on the basis of discussions with scientists of State unit office of Central Ground Water Board, Ranchi to implement suitable conservation measures to augment ground water resources in the area and is also submitted to the Regional Director, Central Ground Water Board, Patna, for his further suggestions. Suitable conservation measures to augment water resource in area are implemented viz construction of sump, etc. is being provided. It may be noted that, there is no chance to intersect ground water table during mining operation.
12	Regular monitoring of ground water level and quality should be carried out by establishing a network of existing wells and constructing new piezometers during the mining operation. The monitoring should be carried out four times in a year – pre-monsoon (April-May), monsoon (August), post-monsoon (November) and winter (January) and the data thus collected may be sent regularly to MOEF, Central Ground water Authority and Regional Director Central Ground Water Board.	The mining operation is confined within shallow depth (20 m max) and not intersected ground water. We are not using ground water for any mining purpose. Piezometer has been installed for monitoring of ground water level. Water quality and water level report are attached herewith as Annexure 1.
13	Prior permission from the competent authority should be obtained for drawl of water from the surface water bodies.	We are not using natural water bodies, ground water for mining purposes. We have obtained NOC for ground water extraction from CGWB.

The vehicles should be covered with a tarpaulin	To keep vehicular emissions in control, vehicles are periodically checked & repaired. All measures are being taken to control vehicular emission including covering with tarpaulin and non-

	and shall not be overloaded.	overloading during transportation.
15	Drills should either be operated with dust extractors or should be equipped with water injection system.	Wet drilling is in practice.
16	Blasting operation should be carried out only during the daytime. Controlled blasting should be practiced. The mitigative measures for control of ground vibration and to arrest fly rocks and boulders should be implemented.	Blasting time is fixed during Lunch Time i.e. 1.00 PM -2.00 PM. Controlled blasting method is in practice. All efforts are being taken to mitigate impact of blasting.
17	Consent to operate should be obtained from SPCB prior to start of enhanced production from the mine.	There is no proposal for production enhancement.
18	Sewage treatment plant should be installed for the colony. ETP should also be provided for workshop and wastewater generated from mining operations.	There is no effluent from mine; hence ETP has not been installed.
19	The project proponent should take all precautionary measures during mining operation for conservation and protection of endangered fauna such as Indian Python etc. Spotted in the study area. Action plan for conservation of flora and fauna shall be prepared and implemented in consultation with the State Forest and Wildlife Department. Necessary allocation of funds for implementation of the conservation plan shall be made and the funds so allocated shall be included in the project cost. Copy of action plan may be submitted to the Ministry and its Regional Office within 3 months.	Action taken for conservation of flora and fauna as under: 1) Permanent pillars are established within the mine lease area. 2) Maintenance of the forest road. 3) Ensured necessary air and noise pollution control measures. 4) Daily water sprinkling is being carried out on the forest road. 5) Transportation is being done during day time.
20	A Final Mine Closure plan along with details of Corpus Fund should be submitted to the Ministry of Environment & Forest 5 years in advance of final mine closure for approval.	Progressive Mine closure plan has been dully approved by Indian Bureau of Mines. FMCP related provision will be compiled as per applicable guideline and timelines mentioned in MCDR/IBM guideline who are competent authority to approve the same. Based on the present resource estimate, and peak rated production capacity mentioned in EC, Mining operation is being carried out.
